Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/768,993	Applicant(s) BARGERON ET AL.	
	Examiner Gregory J. Vaughn	Art Unit 2178	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-40, 61 and 90, drawn to calculating a score related to a fit of document content to document templates for desired pagination, classified in class 715, (Data Processing: Presentation Processing of Document) subclass 525 (Pagination).
- II. Claims 41-51 and 70-80, drawn to inserting content into a document template, where the template regions are resized, classified in class 715, (Data Processing: Presentation Processing of Document), subclass 521 (Boundary Processing).
- III. Claims 52-60 and 81-89, drawn to resizing document elements relative to predetermined constraints classified in class 715, (Data Processing: Presentation Processing of Document), subclass 523 (Format Transformation).
- IV. Claims 62-69 and 91-98, drawn to sequencing document templates based upon an initialized data table that calculates a score for individual templates related to a global or local factor, classified in class 715, (Data Processing: Presentation Processing of Document), subclass 509 (Table).

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I – IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case: invention II has separate utility, such as within a document management system that automatically resizes document template regions to accommodate inserted content in order to facilitate content output (printing); Invention III has separate utility, such as resizing document elements based upon a constant factor, such as would be required for display on systems with dissimilar display screen sizes; Invention IV has separate utility, such as for using a data table to compute a score for documents elements based upon search criteria of a search engine.. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

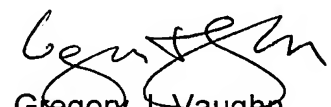

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(1).

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gregory J. Vaughn whose telephone number is (571) 272-4131. The examiner can normally be reached Monday to Friday from 8:00 am to 5:00 pm.
